Ben Kröse

Amsterdam University of Applied Sciences

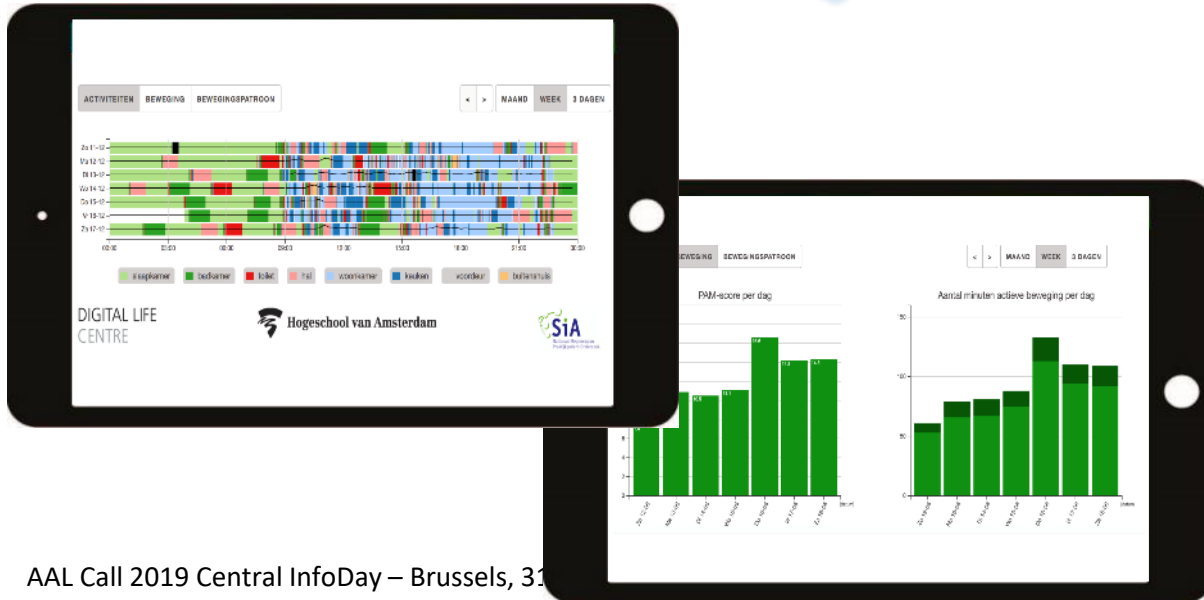

The Digital Life Centre is a research lab at the Amsterdam University of Applied Sciences. We focus on innovative technology, sensors and digital information in everyday life. Applied research is carried out on technology, big data and user-centred design methods. The Amsterdam region is our 'Living Lab'.

We want to extend our existing platform for hip rehabilitation to other user classes (planned hip replacement, knee- or hip osteoarthritis) and give more emphasis on motivational factors in the intervention.

We want large scale implementation

We are looking for partners:

- experienced in persuasive computing and platform building
 - access to end users and can do pilots of the system
- business development expertise in the field of innovative physical therapy/rehabilitation
