VITECO

elearning solutions

- Software house
- EU and national projects
- Assisted living technologies

Project idea

General Objective: to improve the quality of life of elderly and people with minor mobility impairments (at risk of fall), addressing their needs of living autonomously their domestic environments (indoor/outdoor), by:

- performing **networking actions** and enabling services in favor of enterprises.
- strengthening two **Research Centers**, in Catania and Malta
- developing **disruptive innovative research** in the field of assistive technologies
- realizing two **Pilot Demo Sites**

The future of the project

Possible Idea:

E-HEALTH DOMUS

Switch from a healthcare living hub to a **monitored home environment** (*integrated ecosystem of technologies*) through **sensors and home automation**

TARGET GROUPS:

- **Elderly**
- **Disabled**

Looking for

1. Universities

2. Research Centers

3. Companies and Associations in the fields of:

- Assistive Technology
- Sensor Technology
- Digital Technologies for eHealth
- ICT (domotics, virtual reality, augmented reality, artificial intelligence and data monitoring)
- NGOs, entities dealing with elders and disabilities

4. Health-care Entities
