

TOILET FOR ME

D4.1

Dissemination materials: project logo, website, brochure

Project Number	AAL-2019-6-116-CP
Project Name	Toilet4me2
Duration	1 Mar 2020 – 28 Feb 2023
Coordinator	TU Wien
Document ID	D4.1
Release Number /Date	Version v1 / 31 August 2020
Checked and released by	TUW, SAN
Document Type	Other
Original Due Date	PrM6
Dissemination Level	Public
Main Editor	OSF
Contributing Partners	All

Abstract

This document is the deliverable D4.1 “Dissemination materials: project logo, website, brochure” of the Toilet4me2 (Study on supporting active living in (semi-) public environments by suitable toilets) project (short also “T4ME2”) within Call 2019 of the AAL Programme.

This deliverable briefly outlines the first version of the dissemination material which was elaborated for the Toilet4me2 project.

1 Executive Summary

The DoW describes in WP4 the dissemination related activities in the Task 4.1 “Dissemination plan and activities”. It reads as follows:

***Dissemination materials** like project logo, website and brochure will be produced and updated on a regular basis. A **dissemination plan** will be produced early in the project and describe the planned activities including*

- *Design, release and maintenance of the Project Homepage*
- *Issuing a Project Folder for distribution at conferences and meetings*
- *Scientific publications and conference participation*
- *Press releases and other publications, participation in annual AAL Forum*

The outcomes of Task 4.1 are described in the 2 deliverables D4.1 “Dissemination materials: project logo, website, brochure” and D4.2 “Dissemination plan” (the document at hand).

The deliverable D4.1 at hand briefly outlines the elaborated dissemination material (web site, logo, information folder / brochure).

More information about the design process and the decision making process of the consortium can be found in deliverable D4.2.

2 Project Logo

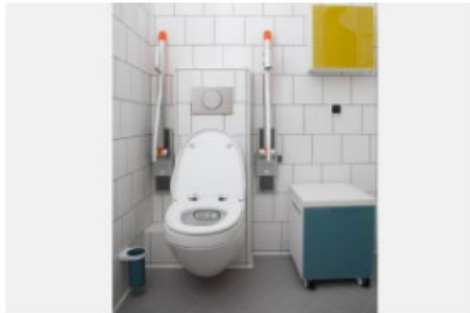

The final version of the logo can be found below.

BE AWARE!

We are going to present and test toilet solutions existing on the market to plan for the future toilet. The potential users of smart and flexible toilet system need hands-on experience to be able to actively contribute in requirements collection and co-design. This is why we included the awareness raising phase in the current project.

ONLINE QUESTIONNAIRE

The Dutch Toilet For Me team is curious about the opinion of Dutch people about the quality and availability of (semi)public disabled toilets in The Netherlands.

4 Information folder / brochure

The folder was designed in an editable version to allow easy modifications for different countries. As example the English master version and the German subversion are given. For further information and other languages please check www.toiletforme.com

4.1 Brochure in English

The aim of the Toilet For Me Too project (T4Me2) is to develop a flexible toilet for use in public and semi-public space that can be used autonomously by older and disabled people when going out. The designed toilet is approachable, clean, safe and easy to use.

We are working on a toilet system with ICT-based, adaptive physical stand-up and control support with integrated safety features. It will allow people with movement or mobility restrictions, who currently require human assistance, to use the toilet independently and safely. This is the next step towards barrier-free toilets in public spaces for the disabled and elderly.

4.2 Brochure in German

Das Ziel des "Toilet For Me Too" Projekts (T4Me2) ist die Entwicklung einer flexiblen Toilette für den öffentlichen und halb-öffentlichen Bereich, die von alten und behinderten Menschen außer Haus selbstständig benutzt werden kann. Sie soll zugänglich, sauber, sicher und einfach nutzbar sein.

Wir arbeiten an einem Toilettensystem mit IKT-unterstützter adaptiver physischer Aufstehunterstützung und intuitiver Steuerung mit integrierten Sicherheitsvorkehrungen.

Damit sollen Menschen mit Bewegungs- und Mobilitätseinschränkungen, die derzeit persönliche Unterstützung benötigen, Toiletten unabhängig und sicher nutzen können. Das stellt einen weiteren Schritt zu barrierefreien Toiletten für behinderte und alte Menschen im öffentlichen Bereich dar.

AAL

Das Projekt T4Me2 wird teilweise von der AAL Association und nationalen Förderorganisationen gefördert. Das europäische AAL Programm fördert Innovationen die Menschen verbindet, gesund, aktiv und zufrieden bis ins hohe Alter macht. Sie unterstützt die Entwicklung von Produkten und Diensten die wirklich etwas im Leben von Menschen bewirken – von jenen die die Herausforderungen des Alters erfahren und denen, die ältere Menschen unterstützen.

Die teilweise Förderung erfolgt durch folgende Organisationen:
